

IPunObservable

```
classDiagram
    class IPunObservable
    class PhotonTransformView
    class PickupItem
    PhotonTransformView --|> IPunObservable
    PickupItem --|> IPunObservable
```

The diagram illustrates a class hierarchy. At the top is the 'IPunObservable' interface. Below it are two concrete classes: 'PhotonTransformView' on the left and 'PickupItem' on the right. Both concrete classes have a solid line with an open arrow pointing up to the 'IPunObservable' interface, indicating that they implement or inherit from it.

PhotonTransformView

PickupItem
